The Land of Broken Promises

A Stirring Stury of the Mexican Revolution

He spoke the words simply, but there was something in his voice that brought up images of the past-of penceful Yaquis, seized at every ranch | in Senera on a certain night; of long marches overland, prodded on by rurales and guards; of the crowded prison-ships from which the most anguished hurled themselves into the sea; and then the awful years of slavery in the poisoned tropics, until only the hardiest were left.

Amigo had seen it all, as the scars on his broad back pro ed-but be withdrew now into silence and left his thoughts unsaid. As he sat there by the fire, one long, black hand held out

gold on his scales he flipped in some more for luck and gave him a sack to hold it.

"What you buy with all that?" he inquired with a friendly grin; "grub?" 'No, senor,' answered Amigo, knotting the precious gold in a handker-

ch.ef; "cartridges!" "What for?" queried Bud, and then it was Amigo who smiled.

"To kill Mexicans with!" he replied, and in those words Hooker read the secret of his thrift.

While his wild brethren fought in the hills or prepared for the battles to | come, it was his part to earn the money that should keep them in ammunition. It was for that, in fact, that Portirio Diaz had seized all the penceful Yaquis in a night and shipped them to Yucatan-for he saw that while they were working the wild Yaquis would never lack.

All the time that Amigo had been doing two men's work and saving on the price of a shirt he had held that cheerful dream in his mind-to kill more Mexicans!

Yet, despite the savagery in him, Hooker had come to like the Yaqui, fore they took that town, and he liked him still. With the rurales on his trail it was better that he should go, but Bud wanted him to return. So, knowing the simple nononty of Indians, he brought out his for the journey.

"Here," he said, "I will lend you my pistol—and you can give it to me when you come back."

"Bure!" answered the Indian, hanging it on his hip; "adjos!"

They shook hands then, and the Yaqui disappeared in the darkness, in the morning, when a squad of rurales closed in on the camp, they found nothing but his great tracks in the

CHAPTER XIX.

It was June and the windstorms which had swept in from the southeast died away. No more, as in the months that had passed, did the dustpillar rise from the dump of the Fortuna mill and go swirling up the can-

A great calm and heat settled over the harassed land, and above the far blue wall of the Sierras the first thunder caps of the rainy season rose up till they obscured the sky. Then, with a rush of conflicting winds, a leaden silence, and a crash of fitckering light, the storm burst in tropic fury and was gone as quickly as it had come.

So, while the rich landowners of the hot country sat idle and watched it grow, another storm gathered behind the distant Sierras; and, as empty rumors julied them to a faire security, auddenly from the north came the news of dashing raids, of railroads cut, troops routed, and the whole border occupied by awarming rebels.

In a day the southern country was isolated and cut off from escape and, while the hordes of Chihushua insurrectos laid slege to Agua Negra, the belated Spanish haclendados came scuttling once more to Fortuna. There, at least, was an American town where the courage of the Angio Saxon would protect their women in extremity, And, If want came to worst, it was better to pay ransom to red-flag generals than to fall victims to handits and loot-

As the bass roffr of the great whistle reverberated over the hills flud Hooker left his lonely camp almost gladly, and with his hard-won gold-dust safe beneath his beit, went galleping into

laws and Mexican patriots had dropped in from day to day and eaten up most of his food, but none of them had caught him napping, and he had no inention that they should.

A conspiracy had sprung up to get rid of him, to harry him out of the country, and behind it was Aragon, But now, with the big whistle blowing. Aragon would have other concerns.

He had his wife and daughter, the beautiful Gracia, to hurry to the town, and perhaps the thought of being caught and hold for ransom would deter him from stealing mines. En reasoned Rud, and, dragging a reluctant pack-animal behind him, he came riding in for supplies.

At the store he bought flour and coffee and the other things which he needed most. As he was passing by the hotel Don Juan de Dios balted him for a moment, rushing out and thrusting a bundle of letters into his hands and hurrying back into the house, asif fearful of being detected in such an act of friendship.

Long before he had lost his pardner Bud had decided that Don Juan was a trimmer, a man who dried to be all things to all people—as a good hotelkeeper should but now he altered his opinion a little, for the letters were from Phil. He read them over in the crowded plaza, into which the first refugees were just beginning to pour, and frowned as he skimmed through

Of Gracia and vaiu protestations of devotion there was enough and to spare, but nothing about the mine. Only in the first one, written on the very day he had deserted, did he so much as attempt an excuse for so precipitately abandoning their claim and his Mexican citizenship. Phil wrote:

Try as he would, Bud could not bring himself to think of his Yaqui as dangerous; and even when he balanced the Indian's murderous bowleknife in his hands he regarded it with a grin. It was a heavy weapon, broad across the back, keen on one edge, and drawn to a point that was both sharp and strong. The haft was wrapped with rawhide to hold the clutch of the hand.

"What do you do with this?" queried Hooker. "Chop wood? Skin deer?" "Yes, thop wood!" answered Amigo,

but he replaced it carefully in his belt. He looked the adobe house over thoughtfully, listened long to the m news of the border and of the rurales' raid on their camp, and retired to the rocks for the night. Even Bud never knew where he slept-somewhere up on the hillside-in caves or clefts in the rocks-and not even the most pressing invitation could make him share the house for a night. To Amigo, as to an animal, a house was a trap; and he knew that the times were
